INFORMATION SYSTEMS UNIT - OBITS

A COMPARISON OF FIRST COMMITMENT CHARACTERISTICS

1995 - 2006

INTRODUCTION

This report presents a multi-year comparison of first-commitment characteristics. The items selected are those that have been most frequently requested and which have also been relatively reliable.

The primary-commitment-offense categories used are:

Violent Offenses: Homicide, robbery, all types of assaults, forcible rape, and kidnapping.

Property Offenses: Burglary, theft (including auto), forgery and check offenses, and arson.

Drug Offenses: All offenses related to narcotics and dangerous drugs.

Other Offenses: All offenses not specified above.

Special Note: This report distinguishes between the Division of Juvenile Justice and Adult Operations of the California Department of Corrections and Rehabilitation. Division of Juvenile Justice cases are youth committed directly to the former Youth Authority (CYA). Adult Operations cases are youth committed to prison, but ordered by the court to serve at least part of their sentence in Division of Juvenile Justice facilities.

Information for this report is gathered from Referral Documents and Reception Center-Clinic Summaries.

HIGHLIGHTS

- In 2006, total first commitments to the Division of Juvenile Justice (DJJ) decreased by 20.4 percent from 2005 first commitments, and decreased by 81.0 percent as compared to 1995 admissions.
- In 2006, Adult Operations cases represented 10.3 percent of all first commitments, as compared to 21.3 percent in 1995.
- Violent offenders -- offenders committed *primarily* for a violent offense -- represented 60.6 percent of all the 2006 first commitments, 5.3 percent more than in 1995. Commitments for property offenses decreased from 58.4 percent in 1995 to 20.4 percent by 2006. Commitments for drug offenses were 7.9 percent during 1995 and 3.2 percent in 2006; and other offenses increased from 8.3 percent in 1995 to 15.8 percent in 2006.
- In 2006, 17.5 percent of first commitments had no prior conviction or sustained petition. In 1995, the comparable figure was 20.0 percent.
- In 2006, 47.1 percent of first commitments had no prior local commitment (e.g., juvenile hall or camp). In 1995, the comparable figure was 48.8 percent.
- The percentage of female first commitments has fluctuated between 4.1 and 6.6 percent for the past 12 years. In 2006, females made up 5.5 percent of all first commitments.
- Historically, the majority of DJJ first commitments have come from the juvenile courts. For the years shown, the proportion of juvenile court commitments has varied from a low of 75.6 percent in 1995 to a high of 95.0 percent in 2003. For 2006, that figure is 88.9 percent.
- The average age at admission has fluctuated over time, from 17.4 years in 1995, to 17.0 years in 1997 through 1999. By 2006, the average age at admission was back up to 17.3 years.
- About half of the youth admitted over the years have had at least one co-offender in the commission of their primary committing offense. In 2006, the figure was 48.5 percent.
- In 2006, 54.7 percent of first commitments came from homes affected by divorce, separation or death of parents, a slight increase from 50.0 percent in 1995. The percentage of those whose parents never married rose slightly from 26.5 percent to 27.1 percent, during the same period.
